EDUCATION

University of Houston, Houston, TX
Bachelor of Science, Computer Science | GPA: 3.9

Expected May 2028

WORK EXPERIENCE

Databases Teaching Assistant | *University of Houston* **Aug 2026 - Present**

- Teach and assist 50+ students in relational database design, SQL query writing, normalization, and transaction management, holding weekly office hours and grading assignments to reinforce core RDBMS concepts.

Cybersecurity Intern | *NRG Energy* **May 2026 – Aug 2026**

- Monitored, triaged, and responded to security alerts across **Linux** and cloud environments, querying logs with **SQL/LEQL** to investigate threats and reduce mean time to detection.
- Integrated AI/LLM-based classification into Python and Java log-parsing tooling, automatically triaging and enriching threat-intelligence signals to cut manual analysis time by 90% for recurring investigations.
- Conducted vulnerability assessments and assisted with remediation tracking, identifying and documenting 50+ findings across internal applications and **Linux** infrastructure.
- Partnered with engineering and business stakeholders to understand operational priorities, translating technology and data risks into business impact to guide remediation, support privacy/regulatory compliance efforts, and improve **NIST** compliance.

Software Engineer Intern | *Energy AI Solutions* **Jan 2026 - May 2026**

- Collaborated with a 5+ member cross-functional team to design and develop an AI-powered coaching application supporting 100+ tech students with personalized career guidance and skill development.
- Integrated LLM API calls into full-stack features built with **React.js, Flask, and MySQL**, streaming AI-generated coaching guidance to users in real time and improving data retrieval efficiency by 30%.
- Developed backend APIs in **Python** to support AI-driven recommendations, user profiling, and progress tracking, processing 1,000+ user data points securely in the cloud.
- Deployed and managed application components using **Azure** cloud services and **Blob** storage, orchestrating data workflows with **Azure Data Factory** to ensure 99% uptime and scalable performance during testing and demos.

Data Structures Teaching Assistant | *University of Houston* **Jan 2026 - May 2026**

- Taught and assisted with implementing core data structures in **C++**, focusing on pointers, memory management, recursion, STL, and Big-O analysis while reviewing and debugging code.

SKILLS

Security & Compliance: Vulnerability Assessment, Security Incident Response, Risk Management, NIST Compliance, Privacy/Regulatory Compliance, Linux, Splunk, SQL/LEQL Log Analysis

Programming Languages: Python, Java, C++, C#, SQL, JavaScript, HTML/CSS

Tools & Technologies: Spring Boot, AWS, Azure, Flask, ReactJS, NodeJS, Git, Docker, Kafka, Kubernetes, Maven, Pandas, NumPy, REST APIs, CI/CD pipelines, Agile/Scrum

PROJECT EXPERIENCE

Codexa - Coding Platform | *Java, Spring Boot, Maven, PostgreSQL, AWS* **May 2025 – Jun 2026**

- Developed a full-stack coding platform using **Java (Spring Boot)** and **PostgreSQL**, designing REST APIs and SQL queries to support code problem retrieval and user submissions, resulting in a 35% improvement in data access speed.
- Deployed the application to **AWS EC2** and **RDS (PostgreSQL)**, implementing CI/CD pipelines that maintained 99.9% service uptime throughout development and testing phases.
- Integrated backend APIs with a **React** frontend, managing authentication, state, and routing to provide a seamless experience for 100+ users.
- Leveraged **Maven** for dependency management and automated builds, streamlining backend workflows and enabling rapid integration of new features.

Color Detector | *Python, OpenCV, Pandas, NumPy, KNN ML* **Apr 2025 - May 2025**

- Developed an interactive image processing tool using **OpenCV** that detects color names and RGB values upon pixel selection, achieving 97%+ accuracy on a dataset of 865 labeled colors.
- Documented test results and edge cases with screenshots and model performance metrics.

LEADERSHIP

Team Director | *Code Coogs* **Aug 2024 - Dec 2025**

- Managed 10+ software development workshops covering 40+ hours of Python and C++ instruction.

AWARDS & CERTIFICATIONS

- CompTIA Security+ (In Progress, exam scheduled Winter 2026)
- Technology Student Association “Video Game Design” 1st & 2nd Place Award, Team Lead (Spring 2024 & 2023)
